REQUEST FOR CORRECTION OF FILING RECEIPT DATA

Office of Initial Patent Examination
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Thank you for the Filing Receipt with respect to the above-identified patent application. We have noticed an error on the Filing Receipt, as explained below:

The Filing Receipt notes:

"THIS APPLN CLAIMS BENEFIT OF 60/261,055 01/13/01*
(*) Data inconsistent with PTO records."

The captioned Utility Patent Application filed with the U.S. Patent and Trademark Office on January 23, 2002 claims priority from U.S. Provisional Patent Application filed on January 26, 2001.

BEST AVAILABLE COPY

U.S. Serial No. 10/055,434

Enclosed in support of this Request for Correction of Filing Receipt Data are the following documents:

- A copy of the Provisional Patent Application Filing Receipt.
- A copy of the first page of the Utility Patent Application noting priority claimed.
- A copy of the Utility Patent Application Filing Receipt with the requested correction noted thereon.

With the requested correction, the Filing Receipt will agree with the U.S. utility patent application as filed. We look forward to receiving a corrected Filing Receipt for this application.

If you should have any questions, please do not hesitate to contact the undersigned at the telephone number listed below.

Respectfully submitted,

Dated: 8/5/04

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 3/0.10 (1)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

**PHASE-CHANGE HEAT RESERVOIR DEVICE FOR TRANSIENT
THERMAL MANAGEMENT***Inventors:*

Der Jeou Chou, Mcsa, AZ
Daniel Todd Nelson, Cave Creek, AZ

CROSS-REFERENCE TO RELATED APPLICATIONS

This invention claims priority from U.S. Provisional Patent Application S/N 60/261,591, filed January 26, 2001, which is hereby incorporated by reference.

BACKGROUND OF THE INVENTION**1. Technical Field**

The present invention relates, generally, to heat transfer systems and, more particularly, to a method of managing thermal transients through the use of phase-change heat reservoirs.

2. Background Information

Recent advances in the design and fabrication of electronic components has dramatically increased their speed and density but has, at the same time, led to significant challenges for thermal engineers seeking to provide heat-transfer solutions for such components. These heat transfer challenges are particularly severe in applications subject to transient heat generation.

Currently known methods of addressing transient heat generation are undesirable in a number of respects. For example, when confronted by thermal requirements of a system, thermal engineers will typically select the maximum heat load in the transient heat profile as the guideline for designing the thermal solution. This "worst-case-scenario" practice invariably results in an unnecessarily large heat sink or cooler that is not used to its full capacity during normal operation.

Furthermore, if there is a space constraint for the overall system which does not allow the full required space for a traditional thermal solution, then the engineer must increase the cooling
